Profile

A passionate Software Developer with experience in Java with SpringBoot, MySQL, and the use and consumption of REST and RESTful APIs. Skilled with tools such as Git and Docker, capable of building and maintaining scalable applications efficiently. Also experienced in applying programming models such as MVC, working with monolithic architectures, and using reactive programming approaches. Has successfully led projects from conception to implementation, consistently delivering innovative solutions that enhance efficiency and customer satisfaction. Possesses strong problem-solving skills, a commitment to technical excellence, and experience in agile methodologies like Scrum, ensuring adaptability and the ability to deliver outstanding results in teamwork. Strong communication, collaboration, and leadership skills enable success in multidisciplinary environments, proactively overcoming challenges and driving success.

Technical Skills

Java, SpringBoot, HTML5, CSS3, JavaScript, TypeScript, NextJs, Tailwind, MySQL, Github, Python, docker

Human Skills

Assertive communication, Teamwork, Effective communication, Adaptation to change, Problem-solving, Critical thinking, Emotional intelligence, Empathy, Leadership

Language level

B1 level

Education

Universidad Autónoma Latinoamericana	Lawyer	2012 - 2017

Non-Formal Education

RIWI, Junior Software Developer (Backend)	October 2023 – August 2024

Professional Experience as a Software Developer

October 2023 - Present	Independent
Junior Software Developer	

Professional Experience as a Lawyer

ENYGMASOFT S.A.S.	Legal Advisor	July 15, 2020 - December 20, 2022

Independent legal advice on content creation, review, and approval of contracts. Consulting on project control, resource management, feasibility studies, and legal representation in hearings.

Projects

LOCALSTORAGE

Languages: Java, Spring Boot
Store inventory management system. As a leader, I helped implement CRUD operations for roles, inventory, and stores using Java and Spring Boot.
Link: https://github.com/Riwi-Meta/$LOCAL_S TORAGE_B ACKEND$

Café Internet Order Management System

Languages: Next.js, TypeScript, Prisma
Full-stack application for managing and administrating orders in an internet coffeShop. Developed using Next.js for the frontend and Prisma ORM for database management.
Link: $://github.com/juansefdz/coffe_s hopAPP - nextJshttps : //github.com/juansefdz/coffe_s hopAPP - nextJs$

SAMI V2

Languages: Java, Spring Boot, Spring Security, MySQL, GoogleMaps API
Continuation of SAMI V1 with front-end redesign, complete back-end implementation using Java, Spring Boot, and Spring Security, JWT, database integration, and GoogleMaps API consumption.
Links: https://github.com/juansefdz/$SAMI_B ACK$,
https://github.com/juansefdz/$SAMI_F RONT$

SAMI V1

Languages: HTML, CSS, JavaScript
Ambulance management and request system developed using HTML, CSS, JavaScript, and external API consumption.
Link: https://github.com/juansefdz/SAMIv1

More Projects: More backend, frontend, and full-stack projects can be found in my GitHub repository.
